

Case Study - NBC Universal

15 high spec acoustic doors installed for NBC Universal

NBC Universal is one of the world's leading media and entertainment companies in the development, production and marketing of entertainment, news and information to a global customer base.

The company owns and operates a valuable portfolio of news and entertainment television networks, a premier motion picture company, significant television production operations, a leading television stations group and world renowned theme parks.

On its own the NBC Television Network broadcasts approximately 5,000 hours of TV programming each year, transmitting to more than 2000

affiliated stations across the United States.

NBC Universal commissioned IAC to construct 15 high spec doors to be included in their executive screenings room, cinema and their digital editing rooms of their Universal Pictures International Entertainment head office located in Central Saint Giles, London.

Munro Acoustics who designed the range of doors are an industry leading acoustic consultancy who specialise in the design of high end music, film and broadcast studio facilities. The doors constructed and fitted by IAC
